

# eLabInventory

---

Flexible sample  
management  
for life science  
laboratories

*Inventory  
& sample  
tracking  
system*

## Why eLabInventory?

eLabInventory is a highly customizable inventory management solution to fit your unique lab environment.

- ✓ Visualize your inventory storage
- ✓ Organize & optimize your lab
- ✓ Maintain a full audit trail for every sample

*Available  
individually or  
integrated into  
eLabJournal*

# Elevate your research

- ✓ Advanced sample management beyond industry standards
- ✓ Reliable and friendly support from our life science product experts
- ✓ Truly customizable to fit your unique workflow. Add-on integrations from eLab Marketplace, plus our API and SDK, are all available to help you future-proof your lab
- ✓ eLabNext is ISO certified. We go through the intensive process of becoming ISO certified to ensure a safe and secure data management system for your peace of mind

# eLabInventory Key Features

Our broad range of features and flexible add-ons makes eLabInventory perfect for your research institution.

- ✓ Visualise your database
- ✓ Keep stock up to date
- ✓ Access from anywhere

## Keep your data secure

A full audit trail is automatically recorded in a chronologically ordered event log following GLP/GMP guidelines.

---

## Access from everywhere

Your data can be securely accessed by you anytime, anywhere. Download our Mobile App (Android & iOS).

---

## Visualize your database

Easily browse through and locate samples and specimen in your entire lab and storage set up.

---

## Keep stock up to date

Set notifications to stay up to date for when chemicals, samples, and consumables run low in stock.

## Eliminate human error

Scan barcodes with our Mobile App or 2D barcode scanner or use our Web App to print labels for sample tubes, boxes, and devices.

## User Roles and Permissions

Set up an unlimited number of user roles and assign permissions per role specific to your lab.

# Step-by-step implementation

We developed a 3-step approach to help you go digital:

## 1. Personal demo

During your scheduled demo, one of our product specialists (all with scientific backgrounds) will give you a personalized and complete product demonstration.

## 2. Workflow set-up

We will help set up your digital lab in a free 30-day trial account so you can have full access to all features according to your unique lab.

## 3. Team training

Our friendly experts provide free training session(s) to answer any questions regarding functionality, add-on integrations, or recommendations for a smooth transition.

# Testimonials

**Justin Krouse,  
PhD, Director -  
AS&T, Central  
laboratory,  
GSK Consumer  
Healthcare**

*“ I needed software that was compliant, secure, easy to setup and use, and most of all flexible. I found eLabInventory and it saved the day. I cannot say enough good things about the software and the support I received through the implementation process. It was so easy to setup and use, I did it with bare minimum of work in less than a week.”*

**Dmitri Lapin,  
Scientist  
Max Planck  
Institute for  
Plant Breeding  
Research**

*“Our group is now using eLabInventory. This is clearly a better level of lab management. It feels like a shift from a simple mobile phone to a smartphone. Thanks to the eLabInventory team.”*

**Joep van den  
Dikke, Research  
Technician  
Utrecht  
University**

*“eLabInventory gives us full insight and control over all our used cell lines, plasmids and their history. Tracking down if a cell line is recently tested for mycoplasma before sending to a collaborating scientist is easy with eLabInventory, every time it gives me the confidence that I am in control over the quality of our work.”*

# Flexible hosting solutions: Cloud, Private and On-Premises

Whether you are a start-up company, a small academic lab, or a large organization with multiple departments across different sites, eLabInventory is suitable for an organization of any type and size.

eLabInventory is available as a service in the Cloud, but also as a customer-specific Private Cloud or a locally hosted On-Premises installation. Our dedicated team of life science account managers supports your organization with a tailored implementation plan.

# Cloud Solutions

Our Cloud Solution is the best choice for customers that do not have the budget or resources to invest in hardware and system maintenance included in the offered licenses.

- ✓ No upfront investments
- ✓ Hosting in ISO-certified data centers
- ✓ Flexible license plans

# Private Cloud Solutions

The Private Cloud Solution can be configured as a cloud application or be restricted to the IP range of your organization.

- ✓ Managed hosting in ISO-certified data center
- ✓ Single sign-on availability
- ✓ Optional access restriction based on IP range

# On-Premises Solutions

Our On-Premises Solution is similar to the Private Cloud Solution but offers installation of the software and all data on company or institute servers.

- ✓ Full system control
- ✓ All data stored locally
- ✓ Individual system customization options

## Get started with eLabInventory today!

- ✓ Personal demo
- ✓ Free lab workflow assessment
- ✓ Friendly expert guidance
