

More than
just an ELN

All-in-one

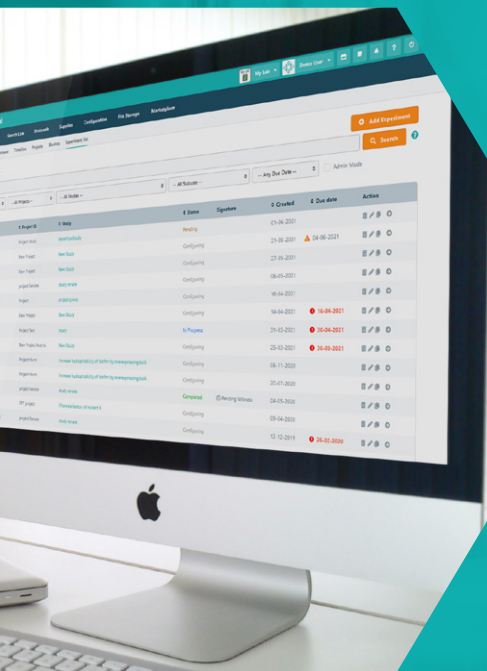

Why eLabJournal?

eLabJournal is an all-in-one Electronic Lab Notebook (ELN) suitable for any lab setting ranging from start-up companies and small academic labs to large institutions and globally operating companies.

- ✓ Fully customizable to fit your workflow
- ✓ Collaborative access to any data
- ✓ Secure & compliant

*Includes modules
for sample tracking
& protocol
management*

Elevate your research

- ✓ Advanced sample management beyond industry standards
- ✓ Reliable and friendly support from our life science product experts
- ✓ Truly customizable to fit your unique workflow. Add-on integrations from eLab Marketplace, plus our API and SDK, are all available to help you future-proof your lab
- ✓ eLabNext is ISO certified. We go through the intensive process of becoming ISO certified to ensure a safe and secure data management system for your peace of mind

eLabJournal Key Features

Improve efficiency in your lab, increase productivity, and generate more output in the same amount of time.

- ✓ Centralised experiment data management
- ✓ Maximized customization with eLab API & SDK
- ✓ Fully integrated sample tracking

- File

MS Office

- MS Excel**
- MS Word
- MS PowerPoint

Electronic Lab Notebook

Elevate your research! Digitally document, organize, search, and archive your experiment data.

Sample Management

Keep your inventory and samples organized and current. Also available separately as eLabInventory.

Procedures and SOPs

Create a step-by-step experimental procedure and design important output parameters.

Link your data and files

Upload any file and link it to your experiment. Our Mobile App (Android & iOS) lets you add images directly.

User Roles and Permissions

Create an unlimited number of user roles and assign permissions per role specific to your lab.

Sign and Witness

In accordance with GLP compliance, request co-workers to provide a witness signature after any report evaluations.

Step-by-step implementation

We developed a 3-step approach to help you go digital:

1. Personal demo

During your scheduled demo, one of our product specialists (all with scientific backgrounds) will give you a personalized and complete product demonstration.

2. Workflow set-up

We will help set up your digital lab in a free 30-day trial account so you can have full access to all features according to your unique lab.

3. Team training

Our friendly experts provide free training session(s) to answer any questions regarding functionality, add-on integrations, or recommendations for a smooth transition.

Testimonials

**Ronnie
Berntson,
Assistant
Professor
Umea
University**

"eLabJournal provides excellent software that makes research easy to document and retrieve, while also providing stellar support, improving our research efficiency. I'm very happy with my eLabJournal subscription."

**Tanya Heim,
Clinical Research
Coordinator
Pittsburgh
University**

"Our lab has established a biobank for over 40 subtypes of sarcoma. We needed a better way to track our biospecimen inventory. eLab allowed us to store clinical information on the same platform where the biospecimen inventory was logged. We used to use separate Excel spreadsheets to track inventory and clinical information, which was tedious and time-consuming. eLabNext has provided a secure platform that is able to grow and adapt to our ever-evolving biobank."

**Katharina
Hannika,
Scientist
Wageningen
University &
Research**

"Working with the eLabJournal and eLabInventory has significantly improved my data management. The digital sample storage has become indispensable from my everyday work, and my research has benefited from the easy collaboration with my colleagues to share protocols, samples and data."

Flexible hosting solutions: Cloud, Private and On-Premises

Whether you are a start-up company, a small academic lab, or a large organization with multiple departments across different sites, eLabJournal is suitable for an organization of any type and size.

eLabJournal is available as a service in the Cloud, but also as a customer-specific Private Cloud or a locally hosted On-Premises installation. Our dedicated team of life science account managers supports your organization with a tailored implementation plan.

Cloud Solutions

Our Cloud Solution is the best choice for customers that do not have the budget or resources to invest in hardware and system maintenance included in the offered licenses.

- ✓ No upfront investments
- ✓ Hosting in ISO-certified data centers
- ✓ Flexible license plans

Private Cloud Solutions

The Private Cloud Solution can be configured as a cloud application or access can be restricted to the IP range of your organization.

- ✓ Managed hosting in ISO-certified data center
- ✓ Single sign-on availability
- ✓ Optional access restriction based on IP range

On-Premises Solutions

Our On-Premises Solution is similar to the Private Cloud Solution but offers installation of the software and all data on company or institute servers.

- ✓ Full system control
- ✓ All data stored locally
- ✓ Individual system customization options

Get started with eLabJournal today!

- ✓ Personal demo
- ✓ Free lab workflow assessment
- ✓ Friendly expert guidance
